Management of Laryngoeal Cancer

Hoarseness and other symptoms

Performance status
Nutritional status
General examination

1. ENT Evaluation- endoscopic assessment includes primary site evaluation (extent, mobility of cord, airway) and biopsy
2. Neck: Neck nodes

Squamous cell Carcinoma

CT Scan Neck except for T1a mid cord lesion
X-ray Chest
CBC, RFT, LFT, Blood sugar

T1N0
T2N0
T1-T2N+, T3N0-N+
T4aN0/N+ (Operable)
T4bor N3
M1

Concurrent Chemo + RT (CCRT)
Not suitable for CCRT
- Cetuximab + RT
- Radical RT

Radical RT or Trans oral Laser ablation/Open partial laryngectomy if expertise available

Evaluation after Treatment

Radical Treatment
Young Patient
Good PS
Low volume primary

Surgery Followed by Post opRT +/- chemo

Radical / Palliative Treatment

Palliative Treatment

Poor GC
