Welcome Message

Dear all,

We welcome you to an engaging scientific event on Paediatric Pathology to be held at Tata Memorial Hospital, Mumbai, India, from 12th to 14th August 2022. It is being organized in conjunction with The Association of Paediatric Pathologists of India (APPI). The scientific programme is exciting with a two - and half-day bonanza focused exclusively on paediatric pathology, more so on paediatric oncopathology along with a few selected non-neoplastic conditions. Paediatric oncology has undergone vast changes in recent years which has invariably reflected onto pathology practices. Similarly, concepts of non-neoplastic conditions exclusive to childhood have also evolved, particularly based on advances in molecular biology. The current trends and concepts will be discussed by the world leaders in Paediatric Pathology helping us gain an insight into this challenging field.

The conference is entirely in physical format; ensuring we are back to our 'old normal' lives. We are looking forward to meeting you.
