Conference Details

Adv No. : PRE_EBMCME2018
Conference Name : Pre - EBM CME Recent advances in Head and Neck pathology
Conference Venue : Dr. R. Choksi Auditorium Complex, Tata Memorial Hospital, Parel, Mumbai
Conference Dates : 22-02-2018 To 22-02-2018

Description

Pre - EBM CME Recent advances in Head and Neck pathology

Head and Neck Pathology

Head and neck pathology is the speciality with the combination of large volumes and overwhelming anatomical diversity. The sinonasal region is known to have the maximum types of tumours per square inch of tissue. Newer immunohistochemical and molecular studies have elucidated the biological behavior of head and neck cancers, leading to a better understanding of these tumours. This has led to a paradigm shift in the approach to head and neck cancers in terms of diagnosis and management, especially in the last five years. Newer classification systems have emerged and many entities have been discovered, renamed or reclassified. This dynamism in head and neck pathology led us to conduct our first international meeting on Head and Neck pathology in 2015, which was a huge success. However, due to significant changes in this field since our last meeting, we once again bring to you an update on recent developments and newer entities in head and neck pathology. This is a one day pre-EBM CME titled "Recent advances in Head and Neck pathology". It will be held on 22nd February 2018 and will feature eminent national and international faculty in the field of head and neck pathology. This one-day academic bonanza will be a complete and exhaustive crash course in head and neck pathology. From basic approach to the latest updates, this meeting is intended to deal with the nitty-gritties of head and neck pathology.

Highlights of the meeting include :

- 8th edition AJCC classification of head and neck tumors including the most important changes like human papilloma related head and neck cancers
- Approach to common and uncommon sinonasal malignancies
- Newer entities in sinonasal malignancies
- Approach to common and uncommon salivary gland tumors
- Molecular evidence for newer entities in salivary gland tumors
- Common pitfalls in thyroid tumours
- A pot-pourri of interesting head and neck cases

Conferences details

Category.	Early Bird Fees	Upto Date	From Date	Fees
Junior Residents & Trainees	2000.00	21-02-2018	21-02-2018	NA

Spot registration details

Category.	Fees
Pre EBM Pathology CME	3000.00
Junior Residents & Trainees	2500.00
